Summary

Web Developer since 2013 who has a keen-eye to design and user experience. Proficient with web programming languages such as PHP, JavaScript, HTML and CSS. Had experiences working with C# Asp.NET, VueJS, NodeJS, databases (MySQL, Firestore and MS SQL).

Aside from my regular work, I provide my expertise to clients (private individuals and established entities) in need of a web based solution. My ability to analyze business requirements and translate them into user experience is one of my strengths. I am also capable of communicating complex ideas to users.

I created a Helpdesk Ticketing System that is used by 3 institutions. Created using VueJS and Laravel.

Personal Details
